❖ (970) 412-4149 ❖ ryanmellott04@gmail.❖ Fort Collins, CO

EDUCATION

Colorado State University

2022 - Present 2026

B.S. Statistics, Minor in Machine Learning - GPA: 3.7

- Classes: Data Analysis, Machine Learning, Probability, Python, R

B.S. Business Administration in Finance - GPA: 3.6

- Classes: Derivative Securities, Debt Securities, Data Analytics and AI

Mountain View Highschool

August 2018 – May 2022

Highschool Diploma – Graduated with Distinction – GPA: 4.1

WORK EXPERIENCE

Colorado State University

January 2026 –Present 2026

Statistics Tutor

Fort Collins

- Aided students in learning statistics and statistical software.
 - Streamlined complex statistics ideas to students.
 - Acted as tech support to students who had software problems.

Colorado State University

May 2026 – July 2026

Research Assistant

Fort Collins

- Analyzed datasets to make informed business decisions
 - Developed machine learning models to do predictive classification
 - Created visuals to convey key information to a less technical audience

Colorado State University

January 2025 –May 2025

Portfolio Manager for Summit Fund

Fort Collins

- Managed endowment funds that were later distributed as scholarships.
 - Ran financial models on various companies to make pitches to the fund.

Colorado State University

January 2023 –August 2025

Electrical Technician

Fort Collins

- Worked with various software to model rooms and make efficiency improvements.
 - Designed and modeled in AUTO CAD, Visual Lighting, and SKM.
 - Worked to fit into budgets, manage timecards, and update excel worksheets.

SKILLS & PROJECTS

Skills:

- Data Analysis with Python, R, and SQL. Scikit-learn, Pandas, Tensorflow.
- Data visualization with Power BI and Matplotlib.
- AWS and Agentic AI experience. Automated data pipelines.
- Microsoft Suite, DCF models.

Projects:

- SEC intelligence dashboard. Automated financial research platform, retrieves SEC data and generates AI-powered summaries for filings and outlook.
- Frog Classification. Developed ML models that predict species. Deployed a interactive shiny app that can be used to analyze results.
- Monte Carlo Simulation. Models future stock prices based on historical returns and volatility.
- Fraud Detection. Machine Learning project that prepares transaction data through a database, compares preprocessing methods and evaluates classification models.
